

"PASSIONATE ABOUT PEOPLE"

THIS IS THE COBALT COMMITMENT

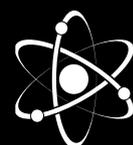

## Seeking the very best radiographers

We are seeking enthusiastic and highly motivated MRI, PET/CT and CT Radiographers to join our expanding team working within the Imaging Centre and also at various mobile MRI locations in the UK

Cobalt is a progressive medical imaging charity providing services from the Cobalt Imaging Centre in Cheltenham, the Institute of Translational Medicine Imaging Centre in Birmingham and through a World leading fleet of mobile MRI scanners. We deliver a national service, including Europe's first and only 3.0 Tesla mobile MRI service and the World's first digital broadband Philips Ingenia 1.5 Tesla and 3.0 Tesla mobile scanners. We are also a leading provider of MRI education, hosting 'MRI in Practice', the international MRI course for radiographers. Our PET/CT service uses state-of-the-art technology with our Siemens PET/CT 128 mCT Flow Edge scanner.

**Cobalt**  
Diagnostic Imaging for Life

**Due to expansion of our services, new vacancies exist for:**

### **Experienced MRI Radiographers**

To provide professional, caring, high quality scanning services and to ensure the privacy, comfort and safety of all patients at Cobalt Imaging Centre, Cheltenham and on the mobile MRI scanner fleet at locations around the UK. The successful applicant will undertake a wide range of MRI procedures effectively and efficiently, working to set standards and protocols functioning in accordance with best practice, meeting professional, departmental and legal standards.

### **Graduate Trainee MRI Radiographers**

Full training in MRI will be provided for this role, through the Cobalt School of Clinical Imaging MRI Training Programme at Cobalt Imaging Centre. Dedicated clinical tutors will supervise the successful applicants through a structured programme and competency framework.

### **PET/CT or CT Radiographer**

Cobalt provides the NHS PET/CT service for Gloucestershire, Herefordshire and Worcestershire, scanning over 3,000 patients each year. Cobalt Imaging Centre is a major centre for dementia diagnosis and research, and provides PET/CT training and education to local clinicians. PET/CT experience would be an advantage. All candidates will be considered as full training can be given.

**Full job descriptions and an application form are available at**
